SKILLS

PROGRAMMING
SQL, Python, Java, HTML, CSS, JavaScript

FRAMEWORKS / TOOLS
Bootstrap, Flask, Spring MVC, Tableau, Power BI, GitHub - Git, Terminal

DATABASE MANAGEMENT
MySQL, MSSQL, Oracle

EDUCATION

SJ CODING DOJO
SOFTWARE DEVELOPEMENT

OHLONE COLLEGE
BUSINESS & DATA ANALYTICS PROGRAM

PROJECTS

Data Analytics
- Create Tableau live reports showing data trends
- Python Scripting w/ SQL & Automation

To Do App - Full Stack Application
- Front End with HTML5/CSS3/JS/Bootstrap
- Server Side with Python-Flask
- DBMS using MySQL
- Cloud Server w/ Amazon AWS & PythonAnywhere

Home Dashboard – - Coming Soon

PROFILE

Hello! My name is Luis, and I am software developer with 8 months of practice in full stack development, and a data analyst during the day with 2+ years of experience. I started in tech 3 years ago and decided to join a coding bootcamp to further my knowledge. Hence, I have chosen to devote myself to a long life of learning in software. I am confident to innovative and develop solutions that are customized to meet a company's organizational needs, and further their success. My job history (from operations, analytics to development) has been diverse and influenced me into becoming a strategic and effective contributor.

WORK EXPERIENCE

SOFTWARE DEVELOPER - CODING DOJO (Nov 2021 – August 2022)
- Developed front-end/back-end app using HTML/CSS/JS and Python/Java, use of OOP
- Co-worked with Designers/Sr. Engineers to develop applications based on project requirements
- Regularly meet with new students and experienced developers, and implement best coding practices to improve project effectiveness in product development

PRODUCTION CONTROL ANALYST - TESLA INC (2020 – Present)
- Developed and modified Tableau reports based on business requirements, and actively listened to cross functional departments needs to provide real-time insights
- Identifying areas of improvement to avoid line down situations by investigating data/machine/associate transactions to able to predict future issues such as demand signals
- Actively participating in the creation of process flows with NPI/Process teams to enhance processes both physical and systematic flow

SUPPLY CHAIN & LOGISTICS SUPERVISOR - TESLA INC (2018 – 2020)
- Actively participating in the creation of process flows with NPI/Process teams to enhance processes both physical and systematic flow at Tesla Livermore/Newark/Oakland/Austin/Berlin
- Worked on various projects and facilitated the physical and systemic transfer of inventory from Oakland to many CA warehouse facilities during Oakland's warehouse closing.
- Facilitated factory gated vehicle to appropriate destinations, escalated and tracked all vehicles under 98% quality specs and with constant damage reports until issues resolved, and actively achieved quarter end delivery KPIs to meet Tesla's previous quarter target

OPERATIONS MANAGER - GAATU INC (2014-2018)
- Completed business trips to Taiwan/Mississippi after project finish to setup and launch project in E-Commerce product development enhancing processes
- Interacting with customer/employee to identify process/quality issues and conducted experiments to determine products' ability to function as intended then implement corrective actions
- Wrote and implemented new operating procedures and trained Process Tech/Associates/Machine Operators/Engineers for updated/ new processes, government, and safety requirements
- Analyze key process trends and translate findings into actionable recommendations. Work closely with Software and Project Engineering.
